SIP LINE SERVICES

New World Netcom SIP Line Services* are designed exclusively for a non-residential environment, the core network is built around "Carrier" grade equipment housed in Local Telephone Exchanges and dedicated Data Centres. The service offers built-in resilience for complete peace of mind and business continuity.

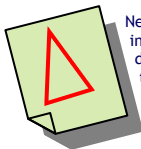

BENEFITS—Utilising New World Netcom SIP Lines offers:

- Free installation with any new telephone system
- Free upgrade of existing ISDN Lines*
- Fixed price monthly rental**
- On-going savings on lower call charges
- Retention of existing telephone number
- Free DDI range of Telephone numbers
- Your Telephone equipment remains unaltered

FEATURES – The features that are provided with your SIP Lines include:

Disaster Recovery

New World Netcom SIP Lines are enabled with a unique integrated Disaster Recovery (DR) programme. Each of your different telephone numbers can be immediately diverted to an alternative number, typically a mobile telephone, thereby ensuring your business continuity and the highest level of service to your valued customers.

Overflow Line

New World Netcom Lines offer you an 'Overflow' line to capture calls which would normally receive a busy engaged tone. The overflow line can be directed to any telephone number you choose, including a mobile or an alternative office location.

Your Number for Life

New World Netcom provides telephone numbers for life. Once you have migrated to our SIP Line Service you can retain your telephone number wherever you may move your operation to within the UK, ensuring your calls follow you, avoiding loss of contact with your customers and suppliers.

Free Calls

New World Netcom give you free telephone calls to all other New World Netcom subscribers, including your branch offices, home workers or any of your frequently dialled telephone numbers of friends and colleagues business.

This is not a promotional offer this is guaranteed for as long as you continue to use our service

21 CN Compliant

BT are upgrading your telephone lines to a Digital Network known as '21CN'. During this upgrade you could experience a number of outages on your existing telephone network. There is no guarantees that your site telephone equipment will be compatible to the '21CN' network.

Migrating to New World Netcom can guarantee to be '21CN' compliant and that you will not encounter any unplanned outages due to BT's network upgrade.
